Education

The University of Texas at Austin

Bachelor of Science: Astronomy

Bachelor of Science: Computational Physics

Certificate: Elements of Computing

August 2020 – December 2023

GPA: 3.8927

GPA: 3.9058

GPA: 4.0000

Boston University

Doctor of Philosophy: Astronomy (in progress)

September 2024 – present

GPA: 3.96

Positions

Boston University | Center for Space Physics

Graduate Research/Teaching/Dean's Fellow

September 2024 – present

Boston, MA

- As a Teaching Fellow, assisted with instruction and grading for *AS 202: Principles of Astronomy I*
- Ran SWMF simulations of magnetic reconnection in solar flares with magnetohydrodynamics and particle-in-cell methods
- Developed algorithms for post-processing and visualizing SWMF simulation data
- Photometrically and polarimetrically observed UV Ceti variables (flare stars) with PRISM aboard the Perkins telescope
- Acted as a Department of Astronomy Graduate Student Representative for the 2025-2026 academic year

The University of Texas at Austin | Department of Astronomy

Research Engineering/Scientist Assistant

January 2024 – July 2024

Austin, TX

- Added `gollum` support for newly released Sonora Diamondback brown dwarf atmospheric models
- Improved `gollum`'s documentation, setup, testing, and directory management systems
- Submitted papers for `blase3D` to ApJ and `gollum` to JOSS

The University of Texas at Austin | Department of Astronomy

AST 375C: Conference Course in Astronomy

August 2023 – December 2023

Austin, TX

- Lead developer of `blase3D`, a fork of `blase` (Gully-Santiago & Morley 2022)
- Used interpretable machine learning with GPUs to clone PHOENIX spectra across T_{eff} , $\log(g)$, and $[Fe/H]$
- Used linear interpolators to create manifolds mapping stellar properties to line-by-line properties

University of Florida | Department of Astronomy

REU Student Researcher

May 2023 – August 2023

Gainesville, FL

- Synthesized a globular cluster escapee sample from APOGEE DR17 and GALAH DR3, combined with Gaia dynamics
- Developed a multithreaded Monte Carlo orbit integration pipeline
- Used chemical, dynamical, and photometric information to match escapee candidates with globular clusters

The University of Texas at Austin | McDonald Observatory

Undergraduate Research Assistant

May 2022 – August 2023

Austin, TX

- Lead developer of the `gollum` Python library, analyzing and visualizing stellar and substellar atmosphere models
- Software architecture improvements, UI/UX improvements, and bug fixes
- Added support for starspot two-component mixture modeling with PHOENIX
- Tested functionality on IGRINS spectra

Publications

- Shankar, S. et al. 2024 *gollum: An intuitive programmatic and visual interface for precomputed synthetic spectral model grids*. JOSS
- Shankar, S. & Gully-Santiago, M. & Morley, C. 2025 *A New Hybrid Machine Learning Method for Stellar Parameter Inference*. ApJ
- Shankar, S. & Bandyopadhyay, A. & Ezzeddine, R. 2025 (in prep) *Tagging Globular Cluster Escapee Candidates from APOGEE and GALAH*. ApJ
- Shankar, S. (in prep) *hydron: A Python interface for launching and post-processing SWMF magnetohydrodynamic simulations*. JOSS
- Shankar, S. et al. 2026 (in prep) *Modeling Fast Magnetic Reconnection in Solar Flare Current Sheets*. ApJ
- Lu, H.-P. et al. 2026 (in prep) *Common Flare-associated Prominence Eruption on the Active M Dwarf AD Leo*.

Technical Skills

Languages: Python, Bash, $\LaTeX$, MATLAB

Frameworks: Pandas, Xarray, Altair, PyTorch, SWMF

Contexts: Data Analysis/Visualization, Computational Fluid Dynamics, High-Performance Computing (TACC, UF HiPerGator, BU SCC, NERSC Perlmutter, NASA HECC), Software Packaging, Multi-Platform Development

Conferences

2026 SHINE Workshop <i>(upcoming)</i>	June 2026
– <i>Modeling Fast Magnetic Reconnection in Solar Flare Current Sheets</i>	<i>Madison, WI</i>
American Geophysical Union 2025 (AGU25)	December 2025
– Presentation: <i>Modeling Fast Magnetic Reconnection in Solar Flare Current Sheets</i>	<i>New Orleans, LA</i>
2025 Joint CEDAR/GEM Workshop	June 2025
– Poster: <i>Modeling Magnetic Reconnection in Ionospheric Ejection Current Sheets</i>	<i>Des Moines, IA</i>
American Astronomical Society 243rd Meeting	January 2024
– Poster: <i>Novel Dynamical Tagging of Globular Cluster Escapee Candidates back to their Sources</i>	<i>New Orleans, LA</i>
2023 Bash Symposium	October 2023
– Poster: <i>Precision Fundamental Stellar Properties with Interpetable Machine Learning</i>	<i>Austin, TX</i>

Fellowships & Awards

The University of Texas at Austin Department of Astronomy Board of Visitors Scholarship	2023
Boston University Dean's Fellowship	2025
2025 Joint CEDAR/GEM Workshop Travel Support Award	2025
Massachusetts Space Grant Consortium Travel Support Award	2025
2026 SHINE Workshop Travel Support Award	2026
